READING, Pa., (October 13, 2016) – EnerSys® (NYSE:ENS), the global leader in stored energy solutions for industrial applications and the manufacturer of ODYSSEY® batteries, offers the ODYSSEY® PC1200LMJT battery as a recommended upgrade for the Polaris® RZR1000.

ODYSSEY® Extreme Series™ batteries can be used for a wide range of Utility Terrain Vehicles (UTVs) and other powersport applications due to their ability to withstand intense performance environments such as rough terrain and harsh weather conditions. Designed with Thin Plate Pure Lead (TPPL) technology, the ODYSSEY® PC1200LMJT battery provides engine-cranking pulses up to 1,200 amps and 540 Cold Cranking Amps (CCA) and can also handle 400 charge-discharge cycles to 80 percent depth of discharge. Additionally, dry cell Absorbed Glass Mat (AGM) separators hold acid in place to prevent spills, even when the battery is installed on its side.

“ODYSSEY® Extreme Series™ batteries are designed to protect against high impact shock and vibration and are virtually maintenance-free due to their dry cell design,” says Alan Kohler, ODYSSEY® battery marketing manager at EnerSys. “With outstanding starting power and massive deep-cycle reserve power, the ODYSSEY® PC1200LMJT battery is a great choice

- more -

for just about any powersport application.”

The ODYSSEY® PC1200LMJT battery includes a metal jacket and brass automotive style terminals, and measures 7.87” L x 6.66” W x 7.60” H and weighs 38.2 lbs.

ODYSSEY® batteries feature a three- to 10-year service life and two-year storage life at 77 degrees Fahrenheit (25 degrees Celsius). They are vibration resistant, classified as “non-spillable” by the U.S. Department of Transportation and include a limited two- to four-year full replacement warranty.

ABOUT ENERSYS®

EnerSys, the global leader in stored energy solutions for industrial applications, manufactures and distributes reserve power and motive power batteries, battery chargers, power equipment, battery accessories and outdoor equipment enclosure solutions to customers worldwide. Motive power batteries and chargers are utilized in electric forklift trucks and other commercial electric powered vehicles. Reserve power batteries are used in the telecommunication and utility industries, uninterruptible power supplies, and numerous applications requiring stored energy solutions including medical, aerospace and defense systems. Outdoor equipment enclosure products are utilized in the telecommunication, cable, utility, transportation industries and by government and defense customers. The company also provides aftermarket and customer support services to its customers from over 100 countries through its sales and manufacturing locations around the world.
